Public Accounting

Public accounting firms are perhaps the most well-known segment of the profession. These firms provide a range of services to external clients, including businesses, individuals, and other organizations. The primary branches within public accounting are:

1. **Audit:** This is a cornerstone of public accounting. Auditors examine financial statements to ensure their accuracy and compliance with accounting standards (like GAAP or IFRS). Forensic accounting often falls under this umbrella, investigating financial discrepancies and fraud.
2. **Tax:** Tax accountants specialize in preparing and filing tax returns for individuals and corporations. They stay abreast of ever-changing tax laws and regulations, offering advice on tax planning and compliance to minimize tax liabilities and ensure adherence to legal requirements. This also includes tax advisory services.
