Conquering the Canine Cinch: A Comprehensive Guide to Putting a Harness on Your Dog

So, you've decided to ditch the traditional collar for a harness, and that's fantastic! Harnesses offer a world of benefits for our furry companions, from better weight distribution and reduced neck strain to improved control during walks and training. But for some dogs (and their humans!), the initial introduction to this new piece of gear can feel like a wrestling match. Fear not! This comprehensive guide will walk you through the process, step-by-step, ensuring a smooth and positive experience for both you and your pup. We'll cover everything from choosing the right harness to making the whole experience a fun, rewarding one.

Why Choose a Harness for Your Dog?

Before we dive into the "how-to," let's briefly touch on the "why." Traditional collars, while common, can sometimes put undue pressure on a dog's trachea, especially in breeds prone to respiratory issues or during vigorous walks. Harnesses, by distributing pressure across the chest and shoulders, offer a gentler alternative. They can also be incredibly helpful for:

1. **Dogs that pull:** Many harnesses are designed with front-clip attachments that redirect your dog's forward momentum, making them less likely to pull.
2. **Brachycephalic breeds:** Short-nosed breeds like Pugs and Bulldogs often benefit greatly from the reduced neck pressure offered by harnesses.
3. **Anxious or fearful dogs:** A secure harness can provide a sense of security and control for dogs who are easily spooked.
4. **Training:** Harnesses can be invaluable tools for specific training exercises, offering better leverage and communication.
5. **Senior dogs or those with injuries:** Some harnesses offer support for dogs with mobility issues, making it easier to assist them.

Choosing the Right Harness: The Foundation of Success

The "how-to" of putting on a harness is only as good as the harness itself. A ill-fitting or uncomfortable harness will make the process a struggle. Here's what to consider:

Types of Dog Harnesses:

The world of dog harnesses is vast, and understanding the different types will help you make an informed

decision.

1. **Back-clip harnesses:** The leash attaches to a ring on the dog's back. These are generally comfortable and good for dogs who don't pull excessively. They are often the easiest for beginners.
2. **Front-clip (or no-pull) harnesses:** The leash attaches to a ring on the dog's chest. These are excellent for dogs who pull, as the leash tension gently redirects them.
3. **Dual-clip harnesses:** These offer both a front and back clip, giving you options for different situations and training needs.
4. **Step-in harnesses:** Designed for dogs to step their front legs through. These can be convenient but sometimes offer less adjustability.
5. **Overhead harnesses:** These have a strap that goes over the dog's head. They are secure but can be more challenging to put on for dogs who are wary of having things over their head.

Fit is King (and Queen!):

Once you've chosen a type, ensure a proper fit. This involves measuring your dog:

1. **Chest Girth:** Measure the widest part of your dog's chest, right behind their front legs.
2. **Neck Circumference:** Measure around your dog's neck where a collar would normally sit.

Most harness manufacturers provide size charts. Aim for a harness that is snug but not tight, allowing you to fit two fingers comfortably between the harness and your dog's body. Avoid harnesses that are too loose (they can slip off or chafe) or too tight (they can restrict movement and cause discomfort).

The Gentle Introduction: Making it a Positive Experience

This is where the magic happens! Your dog's perception of the harness is key to a successful fit. Think of it as a positive reinforcement game.

Step 1: Desensitization and Positive Association

Before you even attempt to put the harness on, let your dog get familiar with it. Leave it lying around the house, toss treats on it, and let your dog explore it at their own pace. Every positive interaction should be rewarded with praise and tasty treats.

Step 2: The "Treat Toss" Method

Once your dog seems comfortable around the harness, you can start incorporating it into positive interactions:

1. Hold the harness and toss treats for your dog to catch or eat from your hand.
2. Gently touch your dog with the harness, rewarding them for staying calm.
3. If your dog is comfortable, try sliding a strap over their head or through their legs while offering high-value treats and effusive praise. If they flinch or back away, go back to the previous step. Patience is crucial here.

Putting on the Harness: A Step-by-Step Breakdown

Now that your dog is generally accepting of the harness, let's get it on! The method will vary slightly depending on the type of harness.

For Back-Clip or Dual-Clip Harnesses (Often the Easiest):

These typically involve two straps that go around your dog's body.

1. **Prepare the Harness:** Unbuckle or unclip all the straps. Lay the harness flat on the floor or hold it open.
2. **Front Paw Introduction:** Most harnesses require you to guide one of your dog's front paws through the opening meant for their legs. Gently lift one paw and guide it through, rewarding with a treat immediately.
3. **Second Paw:** Repeat the process with the other front paw. Some dogs will naturally step their paws through, while others need a little encouragement.
4. **Secure the Chest Strap:** Bring the remaining strap (usually around the belly) up and connect it to the corresponding buckle or clip on the other side of the harness. Ensure it's snug but not too tight – you should be able to slide two fingers underneath.
5. **Secure the Neck Strap (if applicable):** Some back-clip harnesses also have an adjustable neck strap. Fasten this, again ensuring a comfortable fit.
6. **The "Wiggle Test":** Gently encourage your dog to walk a few steps. See if the harness shifts or rubs anywhere. Adjust as needed.

For Overhead Harnesses:

These can be a bit trickier for dogs who dislike having things over their head.

1. **Loosen Straps:** Fully loosen all adjustable straps to create the largest possible opening.
2. **Head First:** Gently guide the main loop of the harness over your dog's head. This is where desensitization is key. Have treats ready to lure your dog's head through.
3. **Legs Through:** Once the head is through, you'll need to guide your dog's front legs through the designated openings. This can be done by gently lifting each leg or by coaxing your dog to step through.
4. **Secure and Adjust:** Once the legs are in place, buckle and adjust all the straps to ensure a snug, secure fit.

For Step-In Harnesses:

These are designed for ease of use, with your dog stepping their front legs into designated loops.

1. **Lay Flat:** Lay the harness flat on the ground in front of your dog, with the leg openings facing upwards.
2. **Encourage Stepping:** Lure your dog to step one front paw into an opening, then the other. Treats are your best friend here!
3. **Secure the Back Strap:** Once both front paws are through, bring the remaining strap around your dog's back and buckle it. Adjust for a snug fit.

Tips for a Stress-Free Harnessing Experience

Beyond the basic steps, a few key strategies can make all the difference:

High-Value Treats are Non-Negotiable!

For initial introductions and any time your dog shows even a little hesitation, use special, extra-tasty treats that your dog absolutely loves. Think small pieces of cooked chicken, cheese, or peanut butter.

Keep it Short and Sweet

Especially during the initial stages, keep harnessing sessions brief. A few seconds of successful wear followed by treats and praise is far better than a prolonged struggle.

End on a Positive Note

Always finish the harnessing experience with something positive, whether it's a treat, a quick play session, or heading out for a fun walk.

Avoid Forcing

Never force your dog into a harness. This will create negative associations and make future attempts much harder. If your dog is truly distressed, take a break and revisit the desensitization process.

Involve the Whole Family

Ensure everyone in the household knows how to put the harness on correctly and consistently uses positive reinforcement techniques.

Practice, Practice, Practice!

The more you practice, the more natural it will become for both you and your dog. Regular short sessions will build confidence and familiarity.

Common Harnessing Hiccups and How to Solve Them

Even with the best intentions, you might encounter a few bumps in the road. Here's how to navigate them:

My dog freezes when I try to put the harness on.

This indicates a need for more desensitization. Go back to letting them explore the harness, associate it with treats, and only touch them with it briefly. Gradually increase the duration and the amount of harness contact.

My dog tries to bite or chew the harness.

This is often a sign of anxiety or frustration. Redirect their attention with a toy or a treat. Again, more positive association with the harness itself is needed. Ensure they aren't trapped or uncomfortable during the process.

The harness slips or chafes.

This is usually a fit issue. Re-measure your dog and consult the manufacturer's sizing guide. Adjust the straps to be snug but not restrictive. Some materials can also cause chafing; consider a padded harness if this is a recurring problem.

My dog just doesn't seem to like it.

Some dogs are naturally more sensitive. Be extra patient and focus on making the harness a positive, non-intrusive part of their life. Celebrate small victories! Sometimes, a different style of harness might be a better fit for a particularly sensitive dog.

Beyond the Fit: Making Harness Walks Enjoyable

Once your dog is comfortable wearing their harness, the real fun begins!

1. **Gradual Introduction to Leash Walking:** Don't expect perfect leash manners on the first try. Start with short walks and gradually increase the duration.
2. **Positive Reinforcement for Good Behavior:** Reward your dog for walking nicely on the leash, with or without pulling.
3. **Check for Rubbing or Irritation:** After each walk, briefly check your dog's skin under the harness for any signs of redness or irritation.
4. **Cleanliness Matters:** Regularly clean your dog's harness to prevent dirt and bacteria buildup.

The Takeaway: A Harness for a Happier, Safer Dog

Putting a harness on your dog might take a little patience and practice, but the rewards are immeasurable. A well-fitting harness enhances your dog's comfort and safety, improves communication during walks and training, and can even be a source of comfort for anxious pups. By following these steps and embracing a positive reinforcement approach, you'll transform the harness from a potential point of contention into a symbol of your shared adventures. So, go forth, conquer the canine cinch, and enjoy many happy, comfortable walks with your beloved furry friend!

Putting a harness on a dog is a fundamental skill that every pet owner should master, ensuring safety, comfort, and effective control during walks and training sessions. Unlike a collar, which applies pressure around the neck, a harness distributes force across the chest and shoulders, reducing strain and minimizing the risk of injury—especially important for dogs prone to pulling or with sensitive necks. Understanding the proper technique not only enhances your dog's comfort but also strengthens the bond between handler and pet through a more positive, stress-free experience. In this guide, we explore the step-by-step process of correctly fitting a harness, highlight key considerations to ensure safety and comfort, discuss the broad applications across different training and daily activities, outline the long-term benefits for both dog and owner, and consider future innovations in harness design and technology.

Choosing the Right Harness for Your Dog

Before putting on a harness, selecting the appropriate type is essential. Harnesses come in various styles—flat, chest, back-clip, and front-clip—each designed for specific purposes. Flat and chest harnesses offer full-body support and are ideal for active dogs or those needing moderate control, while front-clip harnesses gently redirect pulling by guiding the leash away from the dog’s mouth, making them excellent for training recall. For dogs with breathing issues, such as brachycephalic breeds, well-ventilated and lightweight harnesses are vital to prevent pressure on the trachea. Always measure your dog’s neck circumference and consider their size, behavior, and any medical conditions when choosing a harness to ensure optimal fit and function.

Step-by-Step: How to Properly Put a Harness on Your Dog

Begin by laying the harness on a flat, non-slip surface to minimize movement and allow steady handling. Slide your dog gently into the harness, allowing them to become familiar with the new gear without pressure—treat this as a positive experience with gentle praise and treats. Adjust the straps so the harness fits snugly but comfortably, with two fingers easily slipping between the harness and your dog’s body. Ensure the chest clip sits securely across the sternum without restricting movement, and the leash attachment points are aligned with your dog’s shoulders for balanced control. Double-check that no component is twisted or pinching, and always verify the fit before stepping outside—your dog should be able to move naturally, lift their legs, and tilt their head without discomfort.

Applications and Benefits Across Training and Daily Life

A properly fitted harness is indispensable in both everyday walks and structured training. During daily outings, it enhances control without risking injury from sudden pulls, making it ideal for leash training and building obedience. For dogs with pulling habits, a front-clip harness reinforces gentle leash behavior, reducing resistance and encouraging

cooperation. In training environments, a well-fitted harness supports consistent communication through gentle guidance, fostering trust and responsiveness. Beyond control, harnesses protect vital structures like the trachea, making them safer for dogs with respiratory sensitivities. They also improve visibility during nighttime walks by accommodating reflective strips without compromising fit.

Long-Term Benefits for Dogs and Owners

Consistently using the right harness promotes long-term physical well-being by reducing neck strain, joint stress, and the risk of injuries such as collapsed trachea or breathing difficulties. This preventive care supports a happier, more active lifestyle, encouraging regular exercise and socialization. For owners, a comfortable harness leads to more enjoyable walks and training sessions, reinforcing positive associations with outdoor time. Over time, this consistency strengthens the bond between dog and human, built on trust and mutual comfort. Harnesses also extend the usable life of walking routines by accommodating aging dogs with arthritis or reduced mobility, ensuring continued mobility and quality of life.

Looking Ahead: Innovations in Harness Design and Technology

The future of dog harnesses is evolving rapidly, driven by advances in materials, ergonomics, and smart technology. Modern harnesses now feature moisture-wicking, breathable fabrics and padded chest straps for enhanced comfort during extended wear. Innovations like modular clip systems allow customization for leash type, training style, and even medical needs. Looking forward, we anticipate intelligent harnesses equipped with GPS tracking, activity monitoring, and even gentle vibration feedback to reinforce training cues—all seamlessly integrated without compromising safety or comfort. These developments promise to make harness use even more intuitive, adaptive, and supportive, further enriching the lives of dogs and their

caregivers.

Mastering the Art of Harnessing Your Canine Companion: A Comprehensive Guide

For any dog owner, the seemingly simple act of putting a harness on their beloved pet can sometimes feel like a wrestling match. Whether you're dealing with a wriggly puppy, a hesitant rescue, or just a dog who's not a fan of being touched, mastering the technique is crucial for comfortable and safe walks. Beyond just securing your dog, a well-fitted harness can offer significant benefits, from preventing tracheal collapse to managing pulling. This in-depth guide will walk you through the process, exploring different harness types, providing step-by-step instructions, and offering expert tips to make harnessing a positive experience for both you and your canine.

Investing time in teaching your dog to accept a harness is not just about convenience; it's about their well-being. A properly fitted harness distributes pressure more evenly across the chest and shoulders, unlike a collar which can put direct pressure on the delicate trachea. This is especially important for brachycephalic (short-nosed) breeds like Pugs and Bulldogs, as well as for dogs prone to collapsing tracheas. Furthermore, for dogs who tend to pull, a harness can be a more effective tool for gentle control, reducing the risk of injury to both dog and owner.

Understanding Different Types of Dog Harnesses

Before you can even think about putting a harness on, you need to choose the right one. The market offers a bewildering array of options, each designed for specific needs and breeds. Understanding these differences is the first step to a successful harnessing experience.

1. The Standard Back-Clip Harness

This is perhaps the most common type of harness. It features a D-ring on the dog's back, just behind the shoulders, where the leash attaches. These are generally easy to put on and take off, making them a popular choice for everyday walks and for dogs who don't pull excessively. Examples include the popular Ruffwear Front Range Harness and many general pet store options. They are excellent for casual walkers and provide good comfort.

2. The Front-Clip (or No-Pull) Harness

These harnesses have a leash attachment point at the dog's chest. When the dog pulls, the leash gently redirects them back towards the owner, discouraging forward momentum. This makes them an invaluable tool for training dogs to walk politely on a leash. Brands like the Easy Walk Harness and the ZippyPaws Cruizer Harness are well-regarded. For owners struggling with leash reactivity or persistent pulling, a front-clip harness is a game-changer.

3. The Step-In Harness

As the name suggests, step-in harnesses require your dog to place their front paws through two loops. The straps then connect behind their shoulders. These can be great for dogs who are sensitive about having things pulled over their heads. However, ensuring a snug and secure fit can sometimes be more challenging with step-in designs, and they may not offer the same level of control for strong pullers.

4. The Y-Front Harness (or H-Harness)

These harnesses feature a distinctive Y-shaped design that sits on the dog's chest. They typically have two straps that go around the girth and one that goes between the front legs. Many consider the Y-front design to be the most comfortable and ergonomic, as it avoids putting

pressure on the dog's trachea or restricting shoulder movement. The Chai's Choice Best Outdoor Adventure Dog Harness is a prime example of a highly-rated Y-front harness.

5. The Escape-Proof Harness

For those Houdini-like canines who have mastered the art of wriggling out of any restraint, an escape-proof harness is essential. These often feature multiple adjustment points and sometimes an additional strap around the belly to prevent them from backing out. Brands like the Freedom No-Pull Harness are specifically designed with this challenge in mind.

The Anatomy of a Dog Harness: Key Components

Understanding the different parts of a harness will help you adjust it correctly for your dog's unique physique.

- 1. Chest Plate/Panel:** The portion that rests across the dog's chest.
- 2. Back Plate/Panel:** The section that sits on the dog's back, usually where the leash attaches (on back-clip harnesses).
- 3. Girth Straps:** Straps that wrap around the dog's midsection.
- 4. Shoulder Straps:** Straps that go over the dog's shoulders.
- 5. Leash Attachment Rings (D-rings):** Metal loops where you clip your leash.
- 6. Adjustable Buckles/Velcro:** Mechanisms for fine-tuning the fit.

Step-by-Step Guide: How to Put a Harness on Your Dog

Now that you've chosen the right harness, let's get it on your dog. The key to success is patience, positive reinforcement, and making the experience as stress-free as possible.

Preparation is Key: Setting the Stage for Success

Before you even pick up the harness, consider your dog's temperament and your environment. A quiet, familiar space is ideal for the initial

attempts. Have high-value treats readily available - think small pieces of cooked chicken, cheese, or special dog treats your dog absolutely loves. This isn't the time for kibble!

Tip: If your dog has a history of fear or anxiety around being handled or new objects, start by simply having the harness visible in the room. Reward your dog with treats for calmly looking at it, or even for approaching it. Gradually increase the duration of exposure and interaction.

Method 1: The Over-the-Head Harness (Most Common)

This method is typical for many back-clip and Y-front harnesses.

Step 1: Introduce the Harness Positively

Hold the harness in one hand and a treat in the other. Let your dog sniff and investigate the harness. As they do, offer a treat. You want them to associate the harness with good things. Repeat this a few times until your dog seems relaxed.

Step 2: Gently Place the Harness Over Their Head

With the harness open, gently guide one of your dog's ears through the neck loop. If your dog is hesitant, don't force it. Try holding a treat near their nose to encourage them to lower their head slightly or move forward. Once one ear is through, gently guide the rest of their head through the opening.

Step 3: Secure the Girth Strap

Once the harness is around your dog's neck, locate the strap that goes around their belly (the girth strap). Bring this strap under your dog's body and connect it to the corresponding buckle on the other side of the harness. Most harnesses will have a buckle closure here.

Step 4: Adjust for a Snug, Comfortable Fit

This is a crucial step. A harness that's too loose can slip off, while one that's too tight can be uncomfortable and restrict movement. You should be able to comfortably slide two fingers (flat, not bunched up) between the harness and your dog's body at any point. Ensure the chest plate sits comfortably on their chest and doesn't chafe under their "armpits" (where their front legs meet their body).

- 1. Check the neck strap: It should be snug enough that it doesn't slide over their head, but not so tight that it restricts breathing or is uncomfortable.**
- 2. Check the girth strap: Similar to the neck strap, it should be snug but not restrictive.**
- 3. Ensure the chest plate is centered and lies flat.**
- 4. Verify that the leash attachment ring is positioned correctly according to the harness design (usually on the back or front).**

Step 5: Reward and Reinforce

Once the harness is on and properly adjusted, lavish your dog with praise and treats! Let them wear it for a few minutes while you give them more rewards. If they seem comfortable, try attaching the leash and taking a few steps around the house.

Method 2: The Step-In Harness

This method is ideal for dogs who dislike having things pulled over their heads.

Step 1: Lay the Harness Flat

Place the step-in harness on the floor in front of your dog, with the loops for their front paws clearly visible and the buckle/fastening mechanism accessible.

Step 2: Encourage Your Dog to Step In

Lure your dog towards the harness with a treat. Encourage them to step one paw into one of the loops, and then the other paw into the second loop. This may take some coaxing. Positive reinforcement is key - reward each small step in the right direction.

Step 3: Secure the Harness

Once your dog has both front paws through the loops, lift the harness and bring the straps together behind their shoulders. Secure the buckle or fastening mechanism as per the harness instructions.

Step 4: Adjust for Fit

As with the over-the-head harness, adjust the straps so that you can comfortably fit two fingers between the harness and your dog's body. Ensure there's no pinching or chafing, and that the harness sits securely.

Step 5: Praise and Reward

Again, celebrate their cooperation with plenty of praise and tasty rewards!

Method 3: The Martingale-Style Harness (Less Common for General Use)

Some harnesses, often those with a martingale-style adjustment, have a slightly different approach. Always refer to the manufacturer's specific instructions.

Troubleshooting Common Harnessing Challenges

It's rare for every dog to take to a harness immediately. Here are some common issues and how to address them:

My Dog Hates Having Their Head Touched

For dogs sensitive around their heads, the step-in harness is often the best option. If you must use an over-the-head style, start by just holding the harness near their head and rewarding calm behavior. Gradually move it closer, then over their head for brief moments, always pairing with high-value treats.

My Dog Tries to Back Out of the Harness

This is where fit and harness type are critical. Ensure the harness is snug around the girth. For persistent escape artists, consider an escape-proof harness or a combination of a harness and a securely fitted collar.

My Dog Freezes or Seems Uncomfortable

If your dog becomes stiff, tries to flatten themselves, or appears anxious, the harness may be too tight, too loose, or the design might be uncomfortable for their build. Re-adjust the straps, ensuring you can fit two fingers comfortably. Some dogs simply need more time to adjust; short, positive sessions are better than long, stressful ones.

My Dog Won't Walk with the Harness On

This often stems from negative associations or discomfort. Go back to basics: short sessions of wearing the harness around the house with treats and praise. Once they are comfortable, attach the leash and take a few steps, rewarding each positive movement. Gradually increase the distance and duration.

Tips for Making Harnessing a Positive Experience

- 1. Start Young: The earlier you introduce your dog to a harness, the easier they will adapt.**
- 2. Patience is Paramount: Never force your dog. If they are stressed,**

take a break and try again later.

- 3. Positive Reinforcement:** Use plenty of praise, treats, and happy talk to create positive associations.
- 4. Short, Frequent Sessions:** Instead of one long, potentially frustrating session, opt for several short, successful ones.
- 5. Make it a Game:** Incorporate treats and gentle play into the harnessing process.
- 6. Desensitization:** If your dog is fearful, start by simply having the harness present in the room, rewarding calm behavior.
- 7. Proper Fit is Non-Negotiable:** A well-fitting harness is comfortable and safe. Re-check the fit regularly, especially with growing puppies.
- 8. Consult a Professional:** If you're struggling significantly, a certified professional dog trainer or behaviorist can offer personalized guidance.

The Importance of a Properly Fitted Harness

A harness that fits correctly is not just about aesthetics; it's about safety and comfort. A poorly fitted harness can lead to chafing, skin irritation, restriction of movement, and in the worst-case scenario, injury. It can also fail to provide the intended benefits, such as preventing pulling or offering better control.

Remember to check the fit of your dog's harness regularly. Puppies grow quickly, and even adult dogs can gain or lose weight, altering their body shape. A harness that was once a perfect fit may need adjustment.

By following these detailed steps and embracing a positive, patient approach, you can transform the act of putting a harness on your dog from a chore into a seamless part of your daily routine. This will not only make your walks more enjoyable but also contribute significantly to your dog's overall comfort and well-being.

Questions & Answers About how to put a harness on a dog

No	Question	Answer
1	What's the easiest way to get a wiggly dog into a harness?	For a squirmy pup, try luring them with a treat! Hold the treat near the harness opening and reward them for stepping through or reaching for it. Practice makes perfect, so keep it positive and short.
2	My dog hates having things put over their head. Are there harnesses that avoid this?	Absolutely! Look for 'step-in' harnesses. These have two leg holes your dog steps into, and the straps then buckle around their back. They're a game-changer for dogs sensitive about head pressure.

3	How do I know if the harness fits my dog correctly?	A properly fitted harness should allow you to slide two fingers comfortably between the harness and your dog's body at the neck and chest. It shouldn't be too tight, causing chafing, or too loose, allowing escape.
4	What's the difference between a 'pulling' harness and a regular one?	Harnesses designed for pulling (often with a front-clip attachment) redirect your dog's momentum towards you when they pull, making it less rewarding for them to surge ahead. Regular harnesses typically have a back clip and don't offer this redirection.
5	Can I use a harness on my puppy right away?	Yes, it's a great idea to introduce your puppy to a harness early! Start with short sessions, letting them wear it for a few minutes while playing or eating treats, to create positive associations.
6	My dog keeps slipping out of their harness. What am I doing wrong?	This usually means the harness is too loose or the wrong style. Ensure all straps are adjusted snugly but not uncomfortably. Some dogs are escape artists, and you might need a harness with extra security features or a specific fit.
7	Is it better to clip the leash to the front or back of the harness?	For most dogs and general walking, a back clip is standard. If your dog pulls excessively, a front clip on a 'no-pull' harness can help redirect them and teach them to walk more calmly by your side.
8	How do I make putting on the harness a less stressful experience for my dog?	Start by making the harness a positive object. Let your dog sniff it, give them treats near it, and then reward them for interacting with it. Gradually progress to placing it on them for very short periods, always associating it with good things.
9	Are there specific harnesses for different dog breeds or activities?	Yes! For strong pullers, consider front-clip 'no-pull' harnesses. For active dogs, look for durable, padded harnesses for comfort. Some breeds might benefit from harnesses designed to accommodate their unique body shapes (e.g., deep-chested dogs).
