We would establish professional learning communities (PLCs) where teachers can collaborate, share best practices, and analyze student work to identify areas for improvement. Finally, student performance data would be a critical tool in assessing the effectiveness of our instructional strategies and curriculum, informing adjustments and interventions."

Keywords: research-based instruction, curriculum development, rigorous curriculum, engaging curriculum, professional development, formative assessment, instructional rounds, peer coaching, PLCs, student data

analysis, evidence-based practices.

- 4. Fostering a Supportive Culture: Creating a school environment where teachers feel comfortable experimenting with differentiation and are supported in their efforts, viewing challenges as learning opportunities.**

For ELLs, this would include providing resources for language acquisition support and encouraging the use of visual aids and multilingual resources. For students with special needs, it means ensuring seamless collaboration with support staff and the implementation of Individualized Education Programs (IEPs)."

I believe in a tiered intervention system, starting with classroom-based strategies and escalating to more intensive support when necessary, involving counselors, social workers, or parents. Restorative conversations, where students take responsibility for their actions and understand the impact on others, are crucial.
