She consistently advocates for a leadership style that is empathetic, supportive, and focused on the well-being of nursing staff. This means understanding that nurses are individuals with their own strengths, challenges, and aspirations. Just as nursing itself has embraced evidence-based practice (EBP) for patient care, Kelly highlights the need for evidence-based approaches to nursing leadership and management. This principle encourages leaders to:

1. Stay updated on the latest research in healthcare management and organizational behavior.
2. Implement strategies proven to improve staff retention, patient satisfaction, and clinical outcomes.
