Your Hamster's Happy Home: A Kid's Guide to Caring for Your Furry Friend

So, you've got a tiny, whiskered friend scurrying around your home – a hamster! These little bundles of energy are super cute and can be fantastic pets for kids. But even though they're small, hamsters have big needs. Learning how to look after your hamster is a really important and rewarding job, and it's all about making sure they're healthy, happy, and safe. This guide is packed with everything you need to know, from setting up their perfect home to keeping them entertained and healthy. Let's dive in and become the best hamster parents ever!

Choosing the Right Hamster: More Than Just a Cute Face

Before you even bring your hamster home, it's good to know there are different kinds. The most common for kids are Syrian hamsters (often called "teddy bear hamsters" because they're so fluffy!) and Dwarf hamsters. * **Syrian Hamsters:** These guys are bigger and are usually happiest living alone. They're known for being friendly and enjoy interacting with their owners. * **Dwarf Hamsters:** These are much smaller and some species, like Winter Whites and Roborovskis, can live in same-sex pairs or groups if introduced carefully when they're young. However, even with dwarf hamsters, fights can happen, so it's always good to be prepared to separate them if needed. No matter which type you choose, remember that each hamster has its own personality! Some are bold and curious, while others might be a bit shy at first. Give them time to get used to you.

Setting Up Your Hamster's Palace: The Ultimate Cage

Your hamster's cage is their whole world! Making it a comfy, safe, and stimulating place is the first step to a happy hamster.

Cage Size Matters: Bigger is Better!

Forget those tiny pet shop cages. Hamsters are active creatures who love to explore, burrow, and run. They need plenty of space. * **Minimum Recommended Size:** For a single Syrian hamster, aim for at least 450 square inches of unbroken floor space. For dwarf hamsters, at least 400 square inches is a good starting point, but remember they often do best alone or in carefully managed pairs. * **Types of Cages:** * **Tank Cages

(Aquariums):** These are great because they provide excellent ventilation and allow for deep bedding, perfect for burrowing. You'll need a secure mesh lid to keep your hamster in and prevent escapes. * **Wire Cages:** These offer good airflow, but make sure the bar spacing is small enough so your hamster can't squeeze through. They also need a solid base, not a wire one, as wire floors can hurt their little feet. * **Modular Systems:** These can be fun with their tubes and connectors, but sometimes they don't offer enough floor space and can be difficult to clean thoroughly. If you go this route, ensure the main living area is spacious enough.

Bedding: The Foundation of Fun

Hamsters are natural burrowers, meaning they love to dig and create tunnels. Providing the right bedding is crucial for their happiness and health. * **Deep Bedding:** Aim for at least 6-10 inches of bedding in a large portion of the cage. This allows them to create their natural burrows. * **Safe Bedding Options:** * **Paper-based bedding:** This is a popular and safe choice. Look for unscented, dust-free options. * **Aspen shavings:** This is a good option for hamsters, but avoid pine or cedar shavings as their oils can be harmful to a hamster's respiratory system. * **What to Avoid:** * **Fluffy cotton wool bedding:** This looks cute, but it can get tangled around your hamster's limbs, causing injury, and they can't digest it if they eat it. * **Scented bedding:** This can irritate their sensitive noses.

The Essentials: Food, Water, and a Place to Sleep

Every hamster needs the basics to thrive! * **Food Bowl:** A small, heavy ceramic bowl is best. It's less likely to tip over and easy to clean. * **Water Bottle:** A sipper bottle is the cleanest way to provide water. Check it daily to make sure it's working and that the water is fresh. If you prefer, you can use a small, heavy ceramic dish for water, but it needs to be cleaned and refilled daily to prevent contamination. * **Hideout:** Your hamster needs a safe place to sleep and feel secure. This could be a wooden house, a ceramic igloo, or even a half coconut shell. Make sure it's big enough for them to turn around in and has at least one entrance.

Feeding Your Furry Friend: A Balanced Diet

What you feed your hamster is super important for their health. They need a good mix of things to keep them energetic and strong.

The Hamster Food Mix: The Staple Diet

The foundation of your hamster's diet should be a high-quality hamster food mix. Look for one that contains a variety of seeds, grains, and dried vegetables. * **What to Look For:** A good mix will have a good percentage of protein (around 15-20%), fat (around 4-7%),

and fiber. * **What to Avoid:** Avoid mixes with lots of artificial colors or added sugars.

Tasty Treats: What Else Can They Eat?

Hamsters love a little variety! You can offer small amounts of certain fresh foods as treats a few times a week. * **Safe Fruits (in moderation):** Apple (no seeds!), banana, blueberries, strawberries. * **Safe Vegetables:** Broccoli, carrot, cucumber, spinach, kale, sweet potato. * **Protein Boost:** A tiny piece of cooked chicken or a mealworm (a popular hamster treat!) can be offered occasionally.

Portion Control is Key

Don't overfeed your hamster! A general rule of thumb is about one to two tablespoons of food mix per day for an adult hamster. You can also sprinkle a small amount of their daily food into their bedding so they can "forage" for it, which is great for their natural instincts.

Foods to NEVER Feed Your Hamster (Super Important!)

Just like us, some foods are dangerous for hamsters. Always double-check if you're unsure! * **Citrus fruits:** Oranges, lemons, grapefruits. * **Onions and garlic.** * **Raw beans and potatoes.** * **Chocolate and candy.** * **Salty or spicy foods.** * **Anything sugary or processed.**

Keeping Your Hamster Active and Entertained

Hamsters are curious and energetic! Keeping them stimulated will prevent boredom and help them stay healthy.

The Hamster Wheel: A Must-Have!

This is probably the most iconic hamster accessory, and for good reason! Hamsters can run for miles in the wild, and a wheel allows them to do just that in their cage. * **Size is Important:** Make sure the wheel is large enough for your hamster to run with a straight back. If their back is curved, it can cause spinal problems. For Syrian hamsters, a 10-12 inch wheel is usually ideal. Dwarf hamsters might need an 8-inch wheel. * **Solid Surface:** Choose a wheel with a solid running surface, not one with bars or mesh. These can trap little feet and cause injuries.

Tubes and Tunnels: Exploring the Maze

Hamsters love to explore and navigate through tunnels. You can buy plastic tubes or even make your own from cardboard tubes (like toilet paper or paper towel rolls).

Chew Toys: For Healthy Teeth

A hamster's teeth grow continuously throughout their life. Providing safe chew toys is essential to keep their teeth trimmed and healthy. * **Safe Chew Options:** * Untreated wood chews (applewood, willow). * Cardboard tubes and boxes. * Hay-based chews. * Special hamster chew toys made from safe materials.

Digging Boxes: A Burro's Delight

Consider adding a separate digging box filled with a safe substrate like child-safe play sand (ensure it's dust-free and never use calcium sand) or a mix of soil and sand. This gives them an extra outlet for their natural burrowing instincts.

Handling Your Hamster: Building Trust

Taming a hamster takes patience and gentleness. The goal is to build trust so your hamster feels safe and comfortable around you.

The Gentle Approach: First Steps

* **Let Them Settle In:** When you first bring your hamster home, give them a few days to get used to their new surroundings without trying to handle them. * **Talk to Them:** Speak to your hamster in a soft, calm voice when you're near their cage. This helps them get used to the sound of your voice. * **Treats from Your Hand:** Start by offering treats from your fingertips through the cage bars. Once they're comfortable taking treats this way, try placing a treat in your open palm inside the cage.

Picking Them Up: The Right Way

Once your hamster is comfortable eating from your hand, you can try picking them up. * **Cupped Hands:** Gently scoop them up from underneath with both hands cupped together. Never grab them from above, as this can mimic a predator and scare them. * **Keep it Low:** When you first pick them up, hold them over their cage or a soft surface in case they jump. * **Short Periods:** Keep handling sessions short at first, and gradually increase the time as your hamster becomes more relaxed.

Respect Their Space

Remember that hamsters are nocturnal, meaning they are most active at night. Try not to wake them up during the day, as this can stress them out. If they are asleep, let them sleep!

Cleaning Your Hamster's Home: A Healthy Environment

Regular cleaning is essential to keep your hamster healthy and their cage smelling fresh.

Spot Cleaning: Daily Tasks

****Remove Wet Bedding:**** Check the cage daily for any soiled bedding (usually where they pee) and remove it. ****Clean Food and Water:**** Wash their food bowl and check their water bottle daily, refilling with fresh water.

Full Cage Clean: Weekly or Bi-Weekly

This involves replacing most of the bedding and giving the cage a good scrub. ****How Often:**** Depending on the size of the cage and the number of hamsters, a full clean is usually needed every 1-2 weeks. If you notice an ammonia smell, it's time for a clean! ****The Process:**** 1. ****Safely Transfer:**** Gently move your hamster to a secure temporary container (like a travel carrier or a large bin with ventilation and a few familiar items). 2. ****Remove Old Bedding:**** Dispose of all the old bedding. 3. ****Wash the Cage:**** Wash the cage with mild, unscented soap and water. Rinse thoroughly. You can also use a reptile-safe disinfectant if needed, but ensure it's completely dry before adding new bedding. 4. ****Add New Bedding:**** Fill the cage with fresh, deep bedding. 5. ****Return Your Hamster:**** Once the cage is dry and clean, gently return your hamster to their sparkling new home.

Keeping an Eye on Your Hamster's Health

Being a good pet owner means knowing when something isn't quite right.

Signs of a Healthy Hamster:** * **Bright, clear eyes.** * **Clean nose and ears.** * **Good appetite.** * **Active and curious.** * **Smooth, clean fur.** * **Normal droppings (small, dry, and pellet-like).**

When to See a Vet (or Ask an Adult for Help):**

****Lethargy or unusual quietness.**** * ****Loss of appetite or weight loss.**** * ****Dull or unkempt fur.**** * ****Sneezing, wheezing, or difficulty breathing.**** * ****Diarrhea (wet tail) - this is a serious and common hamster illness, especially in younger hamsters. Seek veterinary attention immediately!**** * ****Lumps or bumps on their body.**** * ****Injuries, such as cuts or limping.****

*** **Overgrown teeth or claws.** Your vet is the best person to help if you're worried about your hamster's health. Always involve an adult if you notice any of these signs.**

Hamster Fun Facts for Kids!

*** Hamsters have cheek pouches that they use to carry food back to their burrows. They can stuff a surprising amount in there! * They can't see very well, so they rely on their sense of smell and hearing to navigate. * Hamsters are crepuscular, meaning they are most active during dawn and dusk.**

Conclusion: A Rewarding Journey

Looking after a hamster is a big responsibility, but it's also incredibly rewarding. By providing them with a safe and stimulating environment, a healthy diet, and plenty of gentle interaction, you'll be well on your way to having a happy and thriving little companion. Remember to always involve an adult when making big decisions about your hamster's care, and enjoy the fun and friendship that your new furry friend will bring! Happy hamstering!

Caring for a hamster can be a rewarding and educational experience for children, offering a wonderful chance to learn responsibility, empathy, and the basics of animal husbandry. Hamsters are small, resilient pets that thrive under gentle, consistent care, making them ideal companions for young pet enthusiasts. With the right guidance, kids can develop a lasting bond with their tiny friends while gaining valuable life skills rooted in compassion and attention to detail.

Understanding the Basics of Hamster Care

To ensure a hamster stays healthy and happy, it's essential to first understand its natural behaviors and

needs. Hamsters are nocturnal creatures, meaning they're most active during the night, so observing their rhythms helps children appreciate their unique personalities. These small rodents require a clean, safe environment—typically a spacious cage with proper ventilation, bedding, hiding spots, and safe toys to explore. Daily cleaning of waste and fresh food prevents disease and teaches kids the importance of hygiene. Providing a balanced diet, including hamster-specific pellets, fresh vegetables, and occasional treats like nuts, introduces children to the concept of proper nutrition. Water should always be available, preferably in a drip bottle or shallow dish that's easy to refill and clean.

Creating a Safe and Stimulating Environment

A well-prepared habitat is the foundation of responsible hamster care, and involving children in its setup fosters ownership and attentiveness. When designing the cage, selecting non-toxic materials and secure locks ensures safety while offering exploration opportunities. Adding tunnels, chew toys, and exercise wheels encourages physical activity and mental stimulation, helping kids recognize signs of a healthy, engaged pet. Supervised playtime outside the cage allows children to interact gently, reinforcing trust and bonding. Teaching kids to handle hamsters with care—using one hand to support the body and avoiding sudden movements—builds

gentle handling habits that are crucial for both pet welfare and personal responsibility.

Key Insights for Long-Term Success

Success in hamster care for children hinges on consistency and observation. Daily routines—feeding, cleaning, and play—help kids understand the importance of regular attention and emotional awareness in pet care. Monitoring changes in behavior, appetite, or activity level teaches early recognition of health issues, empowering children to become proactive caretakers. Learning to identify species-specific needs, such as temperature preferences and social behaviors, deepens respect for the animal's individuality. These experiences cultivate patience, empathy, and a sense of accountability that extend far beyond pet ownership.

Benefits Beyond Companionship

Beyond the joy of having a pet, caring for a hamster supports children's development in meaningful ways. The routine nurtures time management and responsibility, while nurturing a living creature fosters emotional intelligence and compassion. Observing a hamster's daily cycle introduces basic concepts in biology and animal behavior, sparking curiosity in science and natural history. These lessons, grounded in daily care, build confidence and encourage thoughtful

decision-making—skills that benefit children in school and life.

The Future of Hamster Care and Childhood Learning

As awareness of animal welfare and responsible pet ownership grows, hamsters continue to serve as accessible, ethical first pets for young learners.

Innovations in cage design and enrichment tools make care even more engaging and safe, supporting age-appropriate interactions without compromising well-being. Looking ahead, integrating technology like educational apps or interactive feeding systems can deepen children's understanding of hamster needs. Ultimately, raising a hamster is more than pet care—it's an immersive, compassionate journey that shapes character, curiosity, and a lifelong appreciation for the delicate balance of life.

[housing](#), [feeding](#), [enrichment](#), and keeping your little friend happy and healthy.

For many children, a hamster is their first pet, offering a valuable opportunity to learn about responsibility, empathy, and the needs of another living creature. It's crucial to approach hamster ownership with a clear understanding of what it entails. This isn't just about enjoying cute fluffballs; it's about providing a safe, stimulating, and healthy environment for them to thrive.

Why Hamsters Make Great Pets for Kids

Hamsters are often considered ideal first pets for several reasons:

- 1. Manageable Size:** Their small stature means they don't require a huge amount of space, making them suitable for many homes.
- 2. Entertaining Nature:** Hamsters are incredibly active, especially at dawn and dusk. Watching them run on their wheels, burrow, and hoard food can be endlessly fascinating for children.
- 3. Relatively Low Maintenance (with the right setup):** While they do require daily attention, they don't need walks like dogs or constant supervision like some other pets.
- 4. Educational Value:** Caring for a hamster teaches children about the importance of routine, hygiene, and respecting the needs of animals.

Understanding Your Hamster's Needs

Before diving into the specifics, it's important to understand that hamsters are nocturnal or crepuscular (most active at dawn and dusk). This means they'll likely be sleeping when your child is at school and most active in the early morning and evening. Respecting their sleep schedule is vital for their well-being. Forcing a sleepy hamster to play can cause stress and make them more prone to biting.

Creating the Perfect Hamster Habitat: A Cozy Home

Choosing the Right Cage: Size Matters!

This is perhaps the most critical aspect of hamster care. Many cages marketed towards children are far too small. A hamster needs ample space to run, burrow, and explore. Aim for a cage that is at least 450 square inches of *uninterrupted floor space*. This is significantly larger than many common hamster starter cages. Think long and wide, rather than tall.

- 1. Tank vs. Wire Cage: Glass tanks (aquariums) or large plastic bin cages (DIY options) are often preferred because they allow for deep bedding, which hamsters love. Wire cages can be suitable if they have a deep base and good ventilation, but ensure the bar spacing is narrow enough to prevent escapes.**
- 2. Ventilation: Good airflow is essential to prevent respiratory issues. If using a tank, a mesh lid is a must.**

- 3. Location:** Place the cage in a quiet area away from direct sunlight, drafts, and loud noises. Avoid placing it near radiators or air conditioners.

Deep Bedding for Burrowing Bliss

Hamsters are natural burrowers. Providing a deep layer of suitable bedding is crucial for their mental and physical health. They will use this bedding to create tunnels, nests, and storage areas. A minimum of 6-10 inches of bedding is recommended, and deeper is even better!

1. Safe Bedding Options:

- 1. Paper-based bedding:** Unscented, dust-extracted paper bedding is a popular and safe choice.
 - 2. Aspen shavings:** This is another good option, but avoid pine and cedar shavings as the oils can be harmful to a hamster's respiratory system.
 - 3. Hemp bedding:** A natural and absorbent option.
- 2. Avoid:** Never use scented bedding, cotton wool, or fluffy bedding, as these can cause impaction or entanglement.

Essential Cage Accessories

Once you have the right cage and bedding, it's time to furnish it with the essentials for a happy hamster:

- 1. Wheel:** A solid-surface wheel is a must. Avoid wire wheels, as they can cause bumblefoot or injuries. The wheel should be large enough for your hamster to run

with a straight back. For most dwarf hamsters, a 6.5-8 inch wheel is suitable, while Syrian hamsters need a 10-12 inch wheel.

- 2. Hideouts:** Hamsters are prey animals and need places to feel safe and secure. Provide at least one or two hideouts, such as ceramic houses, wooden huts, or even overturned ceramic pots.
- 3. Chew Toys:** Hamster teeth grow continuously, so providing safe chew toys is essential for dental health. This can include untreated wood chews, cardboard tubes, or safe commercial chews.
- 4. Water Bottle:** A sipper bottle is the most hygienic way to provide water. Check it daily to ensure it's working and full. Some hamsters also enjoy a heavy ceramic water bowl, but these can be easily tipped over.
- 5. Food Bowl:** A heavy ceramic bowl is best, as it's difficult to tip over and easy to clean.
- 6. Sand Bath:** Hamsters groom themselves by rolling in sand. Provide a dish or dedicated area with chinchilla sand (never dust!) for them to bathe.

Feeding Your Hamster: A Healthy Diet

What to Feed Your Hamster

A balanced diet is crucial for your hamster's health. The staple of their diet should be a high-quality commercial hamster food mix. Look for a mix that contains a variety of seeds, grains, and dried vegetables. Avoid mixes with too much corn or artificial colours.

- 1. Commercial Hamster Mix:** This should make up the majority of their diet.
- 2. Fresh Foods (in moderation):** Small amounts of certain fresh foods can be offered as treats a few times a week. Always introduce new foods slowly and observe for any digestive upset.
 - 1. Vegetables:** Broccoli, cucumber, carrot (small pieces), kale, spinach, bell pepper.
 - 2. Fruits:** Apple (no seeds), banana, berries (in very small quantities).
 - 3. Protein:** Cooked chicken (plain, no seasoning), mealworms, or a tiny piece of hard-boiled egg.

Foods to Avoid

Just as important as knowing what to feed them is knowing what to **never feed your hamster. Some common foods are toxic to them.**

- 1. Citrus fruits**
- 2. Onion and garlic**
- 3. Raw beans**
- 4. Avocado**
- 5. Chocolate**
- 6. Salty or sugary human foods**
- 7. Almonds**
- 8. Rhubarb**

Feeding Schedule and Portions

Hamsters are hoarders, so they will store food. It's best to feed them once a day, typically in the evening when

they become active. Offer a small amount of fresh food daily and remove any uneaten fresh food to prevent spoilage.

Key Tip for Kids: Encourage your child to measure out the food so they don't overfeed. A tablespoon or two of mix per day is usually sufficient, depending on the hamster's size and species.

Keeping Your Hamster Happy and Healthy: Enrichment and Health

Enrichment and Playtime

[Hamster enrichment](#) is about providing activities and items that stimulate their natural behaviours. A bored hamster can become stressed or destructive.

- 1. Out-of-Cage Time: Supervised playtime outside the cage is a great way for your child to bond with their pet. Use a secure playpen or a hamster-proofed room. Always supervise closely!**
- 2. Variety of Toys: Rotate toys to keep things interesting. Cardboard tubes from toilet paper or paper towels are excellent for burrowing and chewing.**
- 3. Foraging Opportunities: Hide small amounts of food or treats around the cage for your hamster to find. This encourages natural foraging behaviours.**
- 4. Different Textures: Provide a variety of safe substrates in addition to bedding, such as coco fiber (ensure it's dust-free and only a small amount) or safe dried leaves.**

Handling Your Hamster Safely

Gentle handling is key to building trust. Start slowly:

- 1. Let Them Get Used to You:** When you first bring your hamster home, give them a few days to settle in. Talk to them softly near the cage.
- 2. Offering Treats:** Offer treats from your hand.
- 3. Gentle Scooping:** Once they are comfortable, try gently scooping them up with both hands, cupping them from underneath. Never grab them from above, as this mimics a predator.
- 4. Short Sessions:** Keep handling sessions short at first.
- 5. Respect Their Signals:** If your hamster is trying to wriggle away or seems stressed, put them back.

Parental Guidance: It's essential for parents to supervise and guide children during handling sessions, especially for younger children, to ensure both the child and the hamster are safe.

Regular Health Checks

A healthy hamster is an active and alert hamster. Keep an eye out for:

- 1. Clear Eyes and Nose:** No discharge or redness.
- 2. Clean Fur:** No bald patches or signs of parasites.
- 3. Normal Eating and Drinking Habits:** Sudden changes can indicate illness.
- 4. Active at Appropriate Times:** They should be alert and exploring during their active periods.

5. No Sneezing or Wheezing: These can indicate respiratory problems.

When to See a Vet

While hamsters are generally hardy, they can get sick. If you notice any of the following, it's time to consult a veterinarian experienced with small animals:

- 1. Lethargy or unusual sleepiness**
- 2. Loss of appetite or weight loss**
- 3. Diarrhea or wet tail (a serious condition in young hamsters)**
- 4. Coughing or difficulty breathing**
- 5. Lumps or sores**
- 6. Difficulty moving**

Finding a vet who specializes in exotic pets or small mammals is crucial for proper diagnosis and treatment.

Cleaning Your Hamster's Home

Spot Cleaning

Daily spot cleaning is essential to keep the cage fresh and hygienic. This involves removing soiled bedding and any uneaten fresh food.

Full Cage Clean

A full cage clean should be done approximately once a week to once a month, depending on the cage size and how quickly it gets soiled. During a full clean:

- 1. Gently remove your hamster and place them in a**

secure temporary container (like a travel carrier or a small, ventilated box with some bedding).

- 2. Remove all old bedding, toys, and accessories.**
- 3. Wash the cage and accessories with mild, unscented soap and water. Rinse thoroughly and ensure everything is completely dry before returning it to the cage.**
- 4. Add fresh, deep bedding.**
- 5. Replace toys and accessories.**
- 6. Gently return your hamster to their clean home.**

Important Note: Try to keep a small amount of the old, clean bedding and mix it with the new bedding. This helps retain your hamster's scent and reduces stress.

The Role of Parents in Hamster Care

While this guide is for kids, parental involvement is absolutely crucial. Hamsters are living creatures with complex needs, and children, especially younger ones, will require significant adult supervision and guidance. Parents are responsible for:

- 1. Ensuring the child understands the commitment involved.**
- 2. Purchasing the correct, appropriately sized cage and equipment.**
- 3. Providing the correct food and ensuring a balanced diet.**
- 4. Supervising handling and playtime to prevent accidents.**

- 5. Recognizing signs of illness and seeking veterinary care when necessary.**
- 6. Helping with regular cleaning and maintenance of the cage.**
- 7. Teaching gentle interaction and respect for the hamster's space and sleep schedule.**

The goal is to make hamster ownership a positive learning experience for your child, fostering responsibility while ensuring the animal receives the best possible care.

Conclusion: A Rewarding Experience

Looking after a hamster can be an incredibly rewarding experience for children and families alike. By providing a spacious and stimulating environment, a balanced diet, and gentle, consistent care, you'll ensure your tiny companion thrives. Remember that patience, understanding, and a commitment to their well-being are the keys to a happy hamster and a happy home. With this guide, you're well on your way to providing your child with a wonderful introduction to pet ownership.

Questions & Answers About how to look after a hamster for kids

N o	Question	Answer
1	My hamster is so cute! What's the very first thing I need to do to take care of him?	That's exciting! The first thing is to get him a cozy home, called a cage! Make sure it's big enough for him to run around and has a soft bedding like paper or aspen shavings. You'll also need a water bottle, a food bowl, and a wheel for him to exercise on.
2	What should I feed my hamster so he stays healthy and happy?	Hamsters love a special hamster food mix, which you can find at pet stores. You can also give them tiny pieces of safe fruits and veggies like apple slices, carrots, or broccoli a couple of times a week. Always make sure he has fresh water in his bottle every day!

3	How often do I need to clean my hamster's cage?	You should spot clean your hamster's cage every day by removing any wet or soiled bedding. A full cage clean, where you replace all the bedding, should be done about once a week to keep things fresh and germ-free for your little friend.
4	My hamster seems to sleep a lot during the day. Is that normal?	Yes, it's totally normal! Hamsters are nocturnal, which means they are most active at night and sleep during the day. Let him sleep undisturbed during the day, and you'll see him come alive to play and explore when it gets dark!
5	How can I be friends with my hamster and pick him up without scaring him?	Be patient! Hamsters can be shy at first. Sit near his cage and talk to him softly. Offer him a small treat from your hand. When he's comfortable, try gently scooping him up with both hands, supporting his body, instead of grabbing him from above.
